

## AUTOBODY AND PAINT SHOP CURTAINS

**SAVE-T** Automotive Curtains from TMI are an affordable way to divide open body shops and repair facilities into isolated work areas. Easily opened and repositioned, these curtains provide greater flexibility than fixed walls. Curtains can be added to any space without the cost, permits and time required by constructing walls.

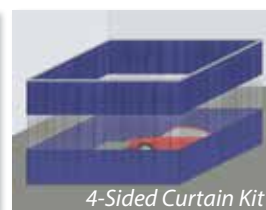

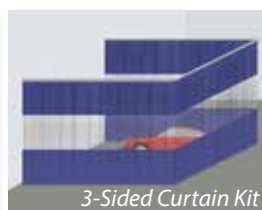

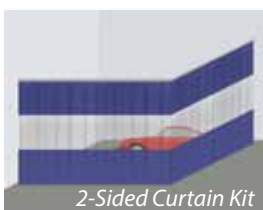

**SAVE-T** Automotive Curtains prevent unwanted dust, paint, metal shavings and other contaminants from spreading between workspaces, so all available floor space can be utilized. More work can be done in the same space to increase productivity and profits.

### FEATURES:

- High quality materials in a wide variety of colors
- Heat-sealed hems offer greater strength and longer life than sewn hems
- Track system can be mounted to a ceiling, beam or wall or suspended with threaded rods or chains
