

**AirGard® EconoClear Flexible Door**

Flexible doors are the original swinging traffic doors and they are still the most economical way to provide easy area to area access. All Chase Flexible doors are custom manufactured to your specific opening size requirements. The EconoClear is designed for use in walk-in coolers, food preparation areas and any other application where conserving energy and complete visibility is essential.

**Door Panel** - The door panel is constructed with clear .120 PVC vinyl for complete visibility and maximum safety. Optional low temperature or anti-static material is available.

**Hinge** - Self closing hinge has zinc base and stainless steel arm for strength and corrosion resistance.

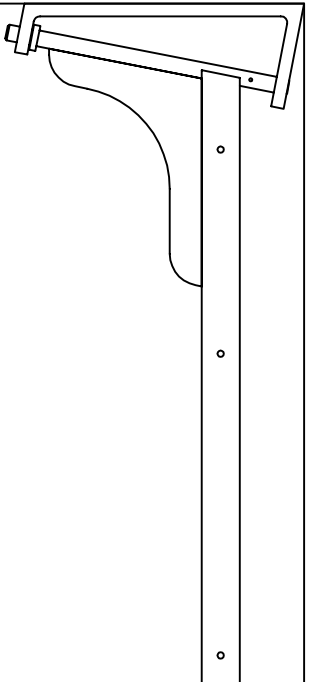

**Impact Plates** - Optional impact plates are available for abusive applications.

**Finished Opening Size:**
