Part 2: Fill in Door Measurements (All Mount Styles)

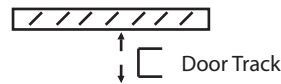

Please Provide Measurements of Height and the Width (in inches) at the Top, Center, and Bottom of the Actual Opening.

If your door is In Jamb or Face of Wall Mounted, please proceed to signature.
If your door is Inside Standoff Mounted, please proceed to Part 3.

Part 3: Inside Stand-off Mount Only - Fill In Dimensions

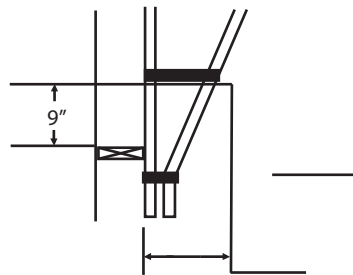

Please provide measurement from the jamb to the outside of the track (A) and the width of existing door guide tracks (B).

Please provide the projection from the wall to the front of the existing door tracks.

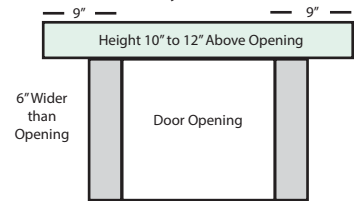

If Bollards are present, please provide measurement between door track and bollard

Please Provide Measurement (in inches) from Wall to Edge of Door Track at Approximately 9" Above the Header.

The illustration below shows the areas that need to be free from any obstacles to allow the door to operate properly. If there are any obstructions in these areas, they must be removed.

Important Product and Application Notes:

- A. Each wind stiffener will have yellow accent safety stripes, and spring loaded doors will include yellow safety pull down straps.
- B. Please Check for Wind and Negative Pressure - If medium to high winds or negative pressure is present, consider upgrading to our high-wind package that includes an extra panel and stiffener.
- C. If your door is being installed on a corrugated building, you may need additional mounting reinforcements (supplied by others)
- D. Inside Stand Off mounted doors do not include a method of sealing an open gap that may exist between the wall and your existing door. Please ask your local installer to supply brush or weatherseal if required.
- E. When used as a Vinyl-Pro, these doors are designed to be a barrier against bugs, birds, temperature, and other elements in interior environments. They do not carrier a wind load rating. If mounted outside, use discretion and make sure the existing sectional or rolling steel door is closed and the roll-up door is up during windy conditions.
- F. Any variations to the door size from what was quoted may change the price of the door.

Application Notes: _____

This door measurement guide needs to be filled out completely before the order can be entered. Charges will be assumed by buyer for changes or cancellations to work in progress. Buyer hereby accepts responsibility for all sizes, dimensions, and door options specified above. **This order will not be processed until door measurement guide is signed and submitted.**
